

TEKNA - TECHNICAL DATASHEET

GEL DISINFETTANTE MANI

TEKNA GEL DISINFETTANTE MANI ANTISETTICO CUTANEO is an antiseptic that is used for the rapid and frequent disinfection of the hands. It is indicated for use in the food sector and also for cleaning the hands of operators. The product is formulated to be suitable for a frequent use, in the shortest possible time and when necessary because it does not require the use of water. For these same reasons, drying is also rapid and the hands are not greasy after use.

TEKNA GEL DISINFETTANTE MANI ANTISETTICO CUTANEO performs an effective disinfectant action against Gram bacteria, positive and negative, mycobacteria and fungi; it is suitable for use in the professional sector ensuring a deep cleaning.

TEKNA GEL DISINFETTANTE MANI ANTISETTICO CUTANEO is ready to use, it quickly dries and it leaves fresh, soft and ready to work your hands. It has no added perfume, but is enriched with emollients. The alcohol content is 70% by volume (which corresponds to 62% by weight), suitable for aseptic hand friction in the absence of soap and water. The quality of the product is further guaranteed by its suitability for HACCP programs (Hazard Analysis and Critical Control Points).

DERMATOLOGICALLY TESTED.

APPLICATIONS

Food sector: hands disinfection in the absence of water.

INSTRUCTION FOR USE

It is used without water. Apply at least 3 ml of product directly on your hand and rub until completely evaporation.
